

# QuillBot

Making Writing Painless

# About QuillBot

**Headquartered in Chicago, Illinois,** QuillBot is an **AI-powered writing platform** on a mission to reimagine writing. QuillBot provides over **36 million monthly active students, professionals, and educators** with free online writing and research tools to help them become more effective, productive, and confident. The QuillBot team was built on the idea that learning how to write and using that knowledge is empowering. They want to automate the more time-consuming parts of writing so that users can focus on their craft. Whether you're writing essays, social media posts, or emails, QuillBot has your back. It has an array of **productivity-enhancing tools** that are already changing the way the world writes.

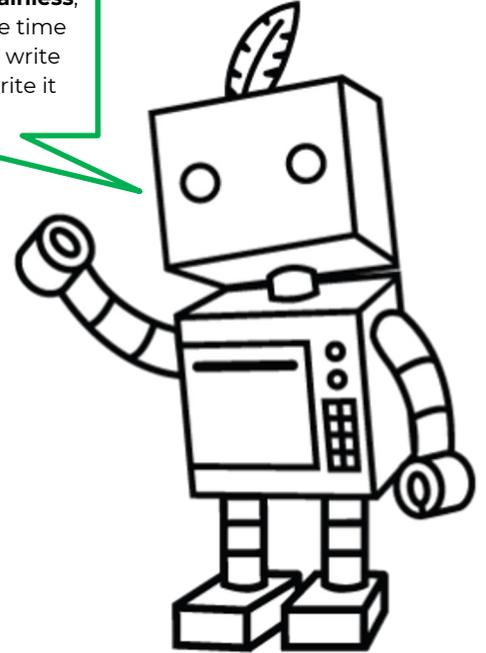

# QuillBot Premium - Tools

- ❖ Paraphraser
- ❖ Grammar Checker
- ❖ Plagiarism Checker
- ❖ co-writer
- ❖ Summarizer
- ❖ Citation Generator
- ❖ Translator

## Vision

Our vision is to **Make writing painless**, so that people can spend more time focusing on what they should write instead of how they should write it

# Paraphraser

The paraphraser does so much more than just reword referenced content--try it for fixing awkward paragraphs, improving weak topic sentences, and getting instant feedback and new ideas you can use to change up the structure, style, vocabulary, and tone of your work.

The screenshot shows the Paraphraser web application interface. At the top, there are language selection tabs for English (UK), German, Hindi, French, and All. Below this is a 'Modes' section with buttons for Standard (selected), Fluency, Formal, Simple, Creative, Expand, Shorten, and Custom. A 'Synonyms' slider is positioned to the right of the modes. The main text area contains the instruction 'To rewrite text, enter or paste it here and press "Paraphrase."' and a 'Paste Text' button with a clipboard icon. A 'Create your own mode' button is also visible. At the bottom left, there is an 'Upload Doc' button, and at the bottom center, a large green 'Paraphrase' button. A vertical sidebar on the right contains icons for settings, chat, keyboard, and refresh.

# Grammar checker

When you've worked on a paper for so long and feel like you just can't read it even one last time to check for any outstanding errors, use the grammar checker for low energy editing and polishing. Think we'd just cover grammar? That's not our style. This tool will catch other writing errors like word misuse, incorrect spelling, and punctuation mistakes.

The screenshot shows a grammar checker interface. At the top, there is a language selection menu with 'English (UK)' selected, and other options for German, French, and Spanish. To the right of the language menu are navigation icons (undo, redo), a font size dropdown set to '15px', and a text color dropdown set to 'Open Sa...'. Further right are icons for bold, italic, underline, text color, background color, bulleted list, numbered list, and a trash icon. A 'Hide Assistant' button is located in the top right corner.

The main text area contains the following paragraph:

Earth is the third planet from the Sun and the only place known in the universe where life has originated and found habitability. This is enabled by Earth being a water world, the only one in the Solar System **sustaining** liquid surface water. Almost all of Earth's water is contained in its global ocean, **spanning** 70.8% of Earth's surface. The remaining 29.2% **are** land, which consists mainly of **continental** landmasses mostly **on** Earth's land hemisphere. While Earth's land is also covered by considerable amounts of water, predominantly in the form of large sheets of ice covering polar land, containing more water than Earth's groundwater, lakes, **rivers** and atmospheric water together, most of Earth's land **though** is covered by vegetation. Earth's land is part of **Earth's** crust, consisting of several slowly moving tectonic plates, **which** interact to produce mountain ranges, volcanoes, and earthquakes. Inside the Earth's crust is a liquid outer core that generates the magnetosphere, deflecting most of the destructive solar winds and cosmic radiation.

The sidebar on the right shows the following suggestions:

- All 11 Grammar 11 Sentence suggestions 12
- Replace with **to sustain** Ignore
- Replace with **which spans**
- Replace with **the planet**
- Correct the subject-verb agreement **are is**
- Correct the spelling error **continental continental**

# Plagiarism Checker

Plagiarism Checker analyzes whether any section of your text did not properly attribute authorship to content already published on the web or in books, research papers, academic papers, or news sources.

QuillBot can scan text in more than 100 languages, such as English, Spanish, French, Portuguese, Arabic, Russian, German, Greek, Chinese, and Japanese.

Scan up to 20 pages per month with a Premium subscription.

QuillBot is committed to promoting and protecting academic integrity. Our Plagiarism Checker, Citation Generator, and guides are built to educate students on best practices to avoid unintentional plagiarism.

We support the following textual file types: html, txt (UTF-8 encoded), csv, rtf, xml, and htm. We also support the non-textual file types, like pdf, docx, doc, pptx, ppt, odt, chm, epub, odp, ppsx, pages, xlsx, xls, and LaTeX.

The screenshot displays the QuillBot Plagiarism Checker interface. At the top, it shows 'SCAN PROPERTIES' with a download icon and a gear icon. The main status area includes: 'DONE' (Scanned 10 months ago), '8 RESULTS FOUND', '194 SIMILAR WORDS', a large red circle, and a '100% MATCH' indicator. A legend below shows: Identical (100%), Minor Changes (0%), Paraphrased (0%), and Omitted Words (0%).

The 'SUBMITTED TEXT' section contains three paragraphs of text about Max Verstappen, with red highlights indicating matches. The 'RESULTS' section shows two search results:

- Max Verstappen - MOSTLY F1**

# co-writer

The Co-Writer is an all-in-one writing space that combines all of QuillBot's tools in one location, allowing you to **paraphrase, check grammar, summarize, create citations**, and write your essay without having to shift between products.

Additionally, the online research capabilities, note-taking, and AI-assisted autocomplete give users a seamless writing and research experience without ever having to leave the page.

The screenshot displays the QuillBot Co-Writer interface. The main window is titled "Water droplet" and contains a document with the following text:

"A drop or droplet is a small column of liquid, bounded completely or almost completely by free surfaces."<sup>(1)</sup> ("Drop (Liquid) - Wikipedia")

1. The unique properties of liquid droplets: Explore how the **behavior** and characteristics of droplets differ from larger bodies of liquid, such as their spherical shape, surface tension, and ability to merge or break apart. 2. Applications in everyday life: Discuss the various ways that droplets are present in our daily lives, ranging from raindrops and water condensation on surfaces to the formation of bubbles and dew. Highlight their significance in natural phenomena and technological advancements. 3. Droplet dynamics: Delve into the complex study of droplet dynamics, which involves understanding the motion, deformation, and interaction of droplets in different environments. Counterexample: However, in certain extreme **conditions** such as microgravity or high pressure environments, droplets can exhibit non-spherical shapes and behave differently than expected due to the absence of gravity or altered surface tension. This challenges the notion that droplets always maintain a spherical shape. so this is to help you **typedown** the necessary **things**

The interface includes a top menu bar with "QuillBot", "File", "Edit", "Format", and "Help". A toolbar below the menu offers various text formatting options. On the right, a "Research" sidebar is active, showing search results for "water droplet" in "Academic" mode. The sidebar lists three results:

- Numerical simulation of the aerobreakup of a water droplet** by J.C. Meng, T. Colonius (Journal of Fluid Mechanics, 2018). Cited by 99. Buttons: Cite, Explore.
- Water droplet bouncing dynamics** by X.Yu, Y.Zhang, B.Hu, X.Luo (Nano Energy, 2021). Cited by 50. Buttons: Cite, Explore.
- A mathematical investigation of water droplet trajectories** by I.Langmuir (1946). Buttons: Cite, Explore.

At the bottom of the editor, a status bar shows "Paraphrase", "Summarize", "Suggest Text", "173 Words", and a red circle with the number "7".

# Summarizer

The summarizer can, of course, be used to keep up with news and extra-long emails, but it can also be used to check reading comprehension and summarizing skills for students looking to enhance their English fluency or get familiar with working in dense or tricky types of writing, such as academic or technical writing.

The introduction of custom summarization gives you the option to tailor the summary based on your need.

Modes: Paragraph Key Sentences Custom Summary Length: Short  Long 

Earth is the third planet from the Sun and the only place known in the universe where life has originated and found habitability. This is enabled by Earth being a water world, the only one in the Solar System sustaining liquid surface water. Almost all of Earth's water is contained in its global ocean, spanning 70.8% of Earth's surface. The remaining 29.2% are land, which consists mainly of continental landmasses mostly on Earth's land hemisphere. While Earth's land is also covered by considerable amounts of water, predominantly in the form of large sheets of ice covering polar land, containing more water than Earth's groundwater, lakes, rivers and atmospheric water together, most of Earth's land though is covered by vegetation. # Citation Generator & Translator

- ❖ QuillBot's new **Citation Generator** tool creates perfect APA, MLA, and Chicago style citations in one click. No ads, no frustrating reloading pages, and no annoying new tabs opening everywhere.
- ❖ For students and researchers in the global community, reading or writing in another language is a valuable skill. With the help of our **Translator** academic professionals can do just that. You can understand studies written in other languages or conduct your own research in a language you don't speak. For example, a German researcher who needs to create a questionnaire for Japanese and Korean participants can write clearly with QuillBot.

# Testimonials

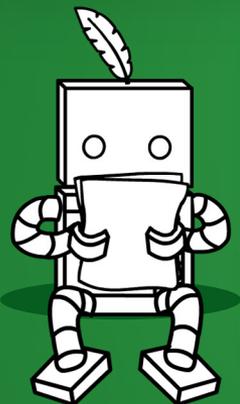

I love it. I thought for awhile that ChatGPT and BARD could do this as well so I cancelled my subscription but it turns out I was wrong, so I renewed it. I am teaching AI at a leading university in Israel and have recommended QuillBot to all my students. Well done!

- [ekaminsky\\*\\*@\\*\\*\\*\\*.com](mailto:ekaminsky**@****.com)

Hello QuillBot Team, I'm a medical doctor based in Australia. I love your product and have used numerous AI applications to help with my day-to-day work. I find your app is the most accurate at summarising complex text and literature; Thanks for creating such an excellent tool to make patient care and education more efficient.

- Harvey

"Hello, I really want to thank you for your service. QuillBot changed my life, I used to write research article in English. I really think that you are geniuses. Really love you guys. Keep going!!!"

- PhD Scholar
